

IN THE SPECIFICATION

Please amend the abstract of this application as follows:

--A reader program [[R_PRG]] parses material stream data [[STR3]] input from an external device [[3]] to perform a detection process of a key [[(K)]] of KLV data from within the data [[STR3]]. The reader program [[R_PRG]] then outputs to an application program [[AP]] an event [[IV]] corresponding to the key (K) detected in step ST1.--
